## 1: STATEMENT ON SIGNIFICANT ACCOUNTING POLICIES

#### BASIS OF PREPARATION OF ACCOUNTS

The financial statements of Sundrop Foods India Private Limited have been prepared and presented in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis. GAAP comprises accounting standards notified by the Central Government of India under Section 133 of the Companies Act, 2013, other pronouncements of Institute of Chartered Accountants of India and the relevant provisions of Companies Act, 2013.

#### USE OF ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles (GAAP) requires Management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities on the date of the financial statements. Actual results could differ from those estimates. Any revision to accounting estimates is recognised prospectively in current and future periods.

#### CURRENT AND NON-CURRENT CLASSIFICATION

All assets and liabilities are classified into current and non-current.

#### Assets

An asset is classified as current when it satisfies any of the following criteria:

- a. it is expected to be realised in, or is intended for sale or consumption in the Company's normal operating cycle;
- b. It is held primarily for the purpose of being traded;
- c. it is expected to be realised within 12 months after the reporting date; or
- d. it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting date.

Apart from the above, current assets also include the current portion of noncurrent financial assets. All other assets are classified as non-current.

#### Liabilities

A liability is classified as current when it satisfies any of the following criteria:

- a. it is expected to be settled in the Company's normal operating cycle;
- b. it is held primarily for the purpose of being traded;
- c. It is due to be settled within 12 months after the reporting date; or
- d. the company does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

Apart from the above, current liabilities also include current portion of noncurrent financial liabilities. All other liabilities are classified as non-current.

#### Operating cycle

Operating cycle is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents.

#### **REVENUE RECOGNITION**

Revenue is recognised on accrual basis as and when services are rendered and billed to the customer in accordance with the terms of the contract (the parent company).

#### EARNINGS PER SHARE

Basic earnings per share ("EPS") is computed by dividing the net profit after tax for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. For the purpose of calculating diluted earnings per share, net profit after tax for the year and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the year, unless they have been issued at a later date.

#### EMPLOYEE BENEFITS

Gratuity which is defined benefit plan, is accrued based on an actuarial valuation using the projected unit credit method at the Balance Sheet date.

The Company's contribution payable to the recognised provident fund, which is defined contribution scheme, is charged to the Statement of Profit and Loss.

The employees can carry-forward a portion of the unutilised accrued compensated absences and utilise it in future service periods or receive cash compensation on termination of employment. Since the compensated absences do not fall due wholly within twelve months after the end of the period in which the employees render the related service and are also not expected to be utilized wholly within twelve months after the end of such period, the benefit is classified as a long-term employee benefit. The Company records an obligation for such compensated absences in the period in which the employee renders the services that increase this entitlement. The obligation is measured on the basis of independent actuarial valuation using the projected unit credit method.

All actuarial gains and losses arising during the year are recognised in the Statement of Profit and Loss of the year.

#### INCOME-TAX EXPENSE

Income tax expense comprises current tax and deferred tax charge or credit.

#### Current tax

The current charge for income taxes is calculated in accordance with the relevant tax regulations applicable to the Company.

#### Deferred tax

Deferred tax charge or credit reflects the tax effects of timing differences between accounting income and taxable income for the period. The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognized using the tax rates that have been enacted or substantially enacted by the Balance Sheet date. Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realized in future; however, where there is unabsorbed depreciation or carry forward of losses, deferred tax assets are recognized only if there is a virtual certainty of realization of such assets. Deferred tax assets are reviewed at each Balance Sheet date and is written-down or written-up to reflect the amount that is reasonably/ virtually certain (as the case may be) to be realized.

The break-up of the major components of the deferred tax assets and liabilities as at Balance Sheet date has been arrived at after setting off deferred tax assets and liabilities where the Company has a legally enforceable right to set-off assets against liabilities and where such assets and liabilities relate to taxes on income levied by the same governing taxation laws.

#### PROVISIONS AND CONTINGENT LIABILITIES

The Company creates a provision when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

#### CASH FLOW STATEMENT

Cash flows are reported using the indirect method, whereby excess of income over expenditure before tax is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from regular revenue generating, investing and financing activities of the Company are segregated.

#### a. Rights, preferences and restrictions attached to equity shares

The Company has a single class of equity shares. Accordingly, all equity shares rank equally with regard to dividends and share in the Company's residual assets. The equity shares are entitled to receive dividend as declared from time to time. The voting rights of an equity shareholder on a poll (not on show of hands) are in proportion to its share of the paid-up equity capital of the Company. Voting rights cannot be exercised in respect of shares on which any call or other sums presently payable have not been paid. Failure to pay any amount called up on shares may lead to forfeiture of the shares. On winding up of the Company, the holders of equity shares will be entitled to receive the residual assets of the Company, remaining after distribution of all preferential amounts in proportion to the number of equity shares held.

## 2. NOTES TO ACCOUNTS (continued)

#### 2.16: Earnings per share

The earnings considered in ascertaining the Company's earnings per share comprise net profit after tax. The number of shares (nominal value of ₹10) used in computing basic earnings per share is the weighted average number of shares outstanding during the year.

#### Computation of earnings per share (EPS):

Particulars	For the year ended 31 March 2015	For the year ended 31 March 2014
Profit after tax	296,573	2,622,854
Weighted average number of equity shares of ₹10 each outstanding during the year	2,000,000	2,000,000
Earnings per share of par value ₹ 10 (basic and diluted)	0.15	1.31

Since, the Company does not have any potential equity shares hence, the basic and diluted earnings per share are the same.
